

FleetNet[®]
America

COX AUTOMOTIVE / MOBILITY

Every Vehicle. Every Service. Connected.

FleetNet America® provides unique benefits for your maintenance department. Our customers experience more on-time deliveries, less downtime, higher PM compliance and lower maintenance costs.

Flexible Real-time Data Accessibility Transparent

Emergency Roadside

FleetNet helps you deliver better customer service by minimizing your downtime during a roadside event.

FleetNet's Roadside service focuses on getting your fleet back on the road fast. Your equipment on the side of the road costs you money. FleetNet's investment in securing America's finest service providers assures superior Roadside service. Our processes ensure each event is handled efficiently and the appropriate personnel are involved to create control of a naturally chaotic situation.

Data Analytics

FleetNet helps you reduce maintenance events by providing data to help you make even better maintenance decisions.

FleetNet can help you reduce your maintenance events by providing benchmarked data so your maintenance team can best identify the root issues that need to be addressed. We can help you gain even better control of your fleet and provide unique insights to make your maintenance operation even more productive.

Fleet Maintenance

FleetNet's TMcare® program delivers best-in-class PM compliance at the lowest total maintenance cost.

Our TMcare® program provides a dedicated maintenance team to manage all maintenance events for specific assets. Our experience, combined with proven, home-grown processes, provide best-in-class PM compliance at the lowest total maintenance cost.

We get you back on the road faster than any other fleet maintenance company in the U.S.

Emergency Roadside

Service Provider Network - By handling more roadside events and treating Service Providers fairly, we have developed long-term relationships to give our customers priority service.

Mechanical Diagnostics - A team of experienced mechanics diagnose your roadside issue and dispatch the appropriate Service Provider. Our Fleet Managers are engaged in the more difficult roadside events to make sure things go as smoothly as possible.

Event Follow-Up - During the event, FleetNet employees follow up with the Provider to ensure commitments are met.

Unique Protocols - Every customer has a customized profile to meet their specific needs. These electronic instructions are visible to every employee handling your event. This process keeps you in control of your fleet.

Constant Communication - Real-time documentation of your event status is a mouse click away. FleetNet keeps you and your driver updated regarding the situation so you can make the best decisions possible.

Data Analytics

Providing Data - FleetNet gives you data to help you measure your miles between breakdowns and miles between repairs allowing you to compare your company year-over-year, against regions or locations and in the near future, against the industry. This allows you to see if improvements are needed in specific areas such as equipment, processes and procedures.

Reducing Breakdowns - Our customers use the data we collect on their fleets to identify root issues causing breakdowns. By focusing on these few root issues, customers are able to find solutions to reduce their breakdowns, thus saving them money.

MOST CUSTOMERS REALIZE
MECHANICAL SAVINGS

12 to 17%

Fleet Maintenance

Mechanical - Our processes can save you money. One customer reduced their maintenance cost by \$100k due to cost avoidance of a driver abuse situation. Other savings are realized by deferred equipment purchase due to higher PM compliance increasing life expectancy of assets and reduction of emergency breakdowns due to issues being handled during PMs.

Back Office - By using FleetNet, our customers have significant back office savings, including accounts payable and other internal departments. As an example, one customer was able to reduce invoices paid from 20,000 to 52 with consolidated billing.

Personnel - With an experienced, dedicated staff managing your equipment, you can focus on your core business while FleetNet ensures your equipment is taken care of throughout the maintenance process.

Towing and Relocation

Towing Savings - With access to the largest nationwide heavy and medium duty towing network available, our customers receive faster response times and 24/7 availability.

Equipment Relocation - FleetNet offers a solution to get equipment relocated within your system and abandoned or new equipment moved to another location while saving you both money and effort. We partner with several of the largest driveway companies in the country to offer competitive rates with excellent service.
